procurement notes - pbdwss - procurement notes 3 guarantee that these goals will not be fully achieved. poor procurement leads to project delays, cost overruns, complaints by bidders, and affects creditability of **modbus and dnp3 communication protocols** - reading data (inputs) modbus reads values from ranges of inputs (and/or outputs) by issuing a single request to read each range or type. all data are treated as "present value". **monitoring and evaluation plan - fsn network** - © world vision india, axshya india project monitoring and evaluation plan, october 2010 page no 2 table of contents 1. list of diagrams 3
